Olympic Tool Company (OTC) is an alternative solution for your folding gluing replacement part needs. OTC performance parts are not affiliated with the OEM manufacturers. Instead, we provide custom, affordable, quality solutions that exceed the OEM standards. All parts viewed in our catalogs are made at our state-of-the-art facility in Bayville, New Jersey. Please visit our website at www.otcinnovate.com to find out more about the OTC advantage. Thanks for taking the time to see what OTC can do for you.

Olympic Tool wants to be your supplier!

When we started supplying packaging companies with parts for their folder-gluer, we had just a handful of quality-made parts to offer. Only a few years later, we have nearly 70 commonly-used parts that are helping our customers find an economical alternative source for their folding-gluing needs.

Our products are engineered and manufactured with the customer in mind and many of these items are offered at more than 30% savings.

Whether it's our single body construction on our folding guides (swords) or the ease of removing bearings on our bogies and tie rods, Olympic Tool provides a value that the OEM cannot match.

If you don't see the part you are looking for in this catalog, please let us know. Chances are, we can add it to our inventory and save you money along the way. We work with all materials: brass, steel, aluminum, delrin and other composites. We proudly manufacture all our products in the U.S.A. with a dedicated, highly-skilled workforce, using the latest technologies in the machining industry.
